

“ Reaching out to the needy and the poor children”

RAKHI GUPTA SEN, (Team Leader, Children's Team, Remedia Trust)

What is your position at Remedia Trust?

Ans: My position in Remedia Trust is that I am heading the Children's Team.

How many study centres do you have and where are they located?

Ans: There are 6 Study Centres at present in Makhla, Bally, Uttarpara, Bhadrakali, Hindmotar. We are opening the seventh one.

What is your perception of Remedia and about the Trustees (in all honesty and in your own Words)?

Ans: Remedia Trust is a genuine NGO where the trustees are completely devoted and honestly inclined towards the betterment of society by reaching out to the needy and the poor. Jill has never said a 'NO' to anyone in need.

How do they help these kids and what are benefits do Remedia provide to these children?

Ans: Remedia and the trustees help the children financially and also provides them with clothes, food items, books, stationery and as much help as possible. We lay the greatest emphasis in educating our children and instilling in them all good virtues, which will help them to become a complete human being.

Could you give me three examples of how kids have benefited by being part of Remedia?

Ans : The three examples are:

A. They are happy to be part of Remedia Trust. You should see them walking towards the Centres with so much joy on their faces and an incredibly inspiring zeal in their hearts!!

B. Teachers at our Centres strive hard to clear doubts of our children on several subjects. This is very enriching for our children as this is something they don't get in their schools.

C. Books and copies and all possible stationery items have been and will always be provided to our children.

Tell me about all your Teachers & volunteers? How many do you have working under you? What background do they come from and how are they qualified to teach these kids?

Ans: At present I have 8 teachers working with me. Volunteers are about 6 or 7. They mostly come from good backgrounds. Some are teachers. Others are housewives. While some working professionals. They are well educated and take great interest in teaching our children.

What are your plans for Remedia for the future? What do you think a Trust like this is capable of and how can the government help you to expand on what you are doing?

Ans: Remedia Trust can reach out to more. As I have told earlier that we are here only for the poor and needy as it is evident if one gets closer to Jillian. The government can surely help by providing first abig building where we can bring our children together.

If there was one message you could give to kids who are well-off today, what would it be?

Ans: The message to the well-off children is come and mix with the needy. You will get to realise they too dream and aspire like you do but their means are limited. And if each one of us strive to make a difference then we can surely create a huge difference in our society. All it takes is one positive effort from our side
